INDEX TO VOLUME XIV

THE SCIENCE TEACHER 1948

Alcohol and Tobacco, Critical Thinking in the Use of, Marie Cherbonnier, 114.

Atom, Nobel Prize Winner on the, P. M. S. Blackett, 163.

Atomic Age, Teaching Science for the, Alex B. Novikoff, 25.

Atomic Energy, Source Unit on, Hubert J. Davis, 155.

Audio-Visual Aids in Physics, Harold B. McCreight, 67.

Audio-Visual Materials in Elementary Science, Margaret Albrecht, 33.

Audio-Visual Problems and Suggestions, V. S. Keele, 167.

Auto Mechanics Course, George R. Darby, 159.

Biological Sciences, The Effectiveness of Our Schools in the Teaching of, Glenn W. Blaydes and L. V. Domm, 57.

Chats with Science Teachers, Hanor A. Webb, 30; 123; 175.

Club Hobby Can Become a Class Activity, Mary M. Hawkes, 120.

Club, National and State Organizations Cooperate to Help Your Science, 171..

Conference on Industry-Science Teaching Relations, 19.

Conservation Unit, Correlations with a, Charles W. Collins and M. A. Wight, 165.

Consultant Service, N.S.T.A. to Develop, 176.

Demonstrating Physics, Simplicity in, Richard M. Sutton, 22; 64; 112.

Design for Scholarship, W. F. McLean, 173.

Elementary Science, Audio-Visual Materials in, Margaret Albrecht, 33..

Elementary Science Teachers, Aids to, Dwight E. Sollberger, 174.

Gardens Should Be Planned for Children, Children's, Paul R. Young, 21.

Gay-Lussac's Law and the Absolute Zero, H. Clyde Krenerick, 66.

General Science, Home Made Equipment in Teaching, Louis T. Cox, 69; 124.

Good Science Projects Need Not Be Expensive, Margaret E. Patterson, 70.

How One Teacher Does It, Paul Brandwein, 126.

Illumination, Experiments in, W. E. Miller, 161.

Industry-Science Teaching Relations, Conference on, 19.

Industry-Science Teaching Relations, Summary Report of the First Conference of the Advisory Council on, 77.

Junior Scientists Assembly in Chicago, Margaret E. Patterson, 27.

Laboratory First, S. Fred Calhoun, 158.

Mathematics—Grades One to Twelve, Raleigh Schorling, 59.

Microscope Techniques for Locating Objectives, Lee R. Yothers, 178.

Model of the Solar System, Fletcher G. Watson, 24.

Nature Riddles, Edith F. Miller, 125.

New Films, 118; 170.

Nominating Committee for 1948-9, Report of N.S.T.A., 80.

N.S.T.A. to Develop Consultant Service, 176.

Periodic Chart of the Elements, Electric, James R. Irving and Thomas E. Smith, 157.

Physics, Audio-Visual Aids in, Harold B. McCreight, 67.

Physics, Simplicity in Demonstrating, Richard M. Sutton, 22; 64; 112.

Report on the Effectiveness of Science Teaching Was Needed, Why the, Philip N. Powers, 11.

Robert H. Carleton—N.S.T.A. Executive Secretary, 110.

Rooms for Secondary Schools, Science, Morris Meister, 75.

Scholarship, Design for, W. F. McLean, 173.

Science Education, A Chemist Looks at, C. H. Sorum, 36.

Science Education, Outlook in, Morris Meister, 105.

Science in Elementary and Secondary Education, Morris Meister, 13.

Science Is Fun, William F. Dresia, 119.

Science Problems of National Significance, W. Edgar Martin, 151.

Science Projects Need Not Be Expensive, Good, Margaret E. Patterson, 70.

Science Teaching Today, K. Lark-Horotvitz, 61.
Sexual Behaviour, Kinsey's Study of, Joseph Singerman, 31.
Slides in the Science Classroom, Using, E. W. Caughfield, 169.
Solar System, A Model of the, Fletcher G. Watson, 24.
Some Lecture Demonstrations, Frederic B. Dutton, 116.
Standards, Professional, Morris Meister, 63.
Teaching of the Physical Sciences, The Effectiveness of the, Lloyd W. Taylor, 16.
This and That, R. D. Jones, 20; 74; 108; 154.
Using Slides in the Science Classroom, E. W. Caughfield, 169.

AUTHOR INDEX

Albrecht, Margaret, Audio-Visual Materials in Elementary Science, 33.
Blackett, P. M. S., Nobel Prize Winner on the Atom, 163.
Blaydes, Glen W., The Effectiveness of Our Schools in the Teaching of the Biological Sciences, 57.
Brandwein, Paul, How One Teacher Does It, 126; 180.
Calhoun, S. Fred, Laboratory First, 158.
Caughfield, E. W., Using Slides in the Science Classroom, 169.
Cherbonnier, Marie Elina, Critical Thinking in the Use of Alcohol and Tobacco, 114.
Collins, Charles W. and Wight, M. A., Correlations with a Conservation Unit, 165.
Cox, Louis T., Home-Made Equipment in Teaching General Science, 69; 124.
Davis, Hubert J., Source Unit on Atomic Energy, 155.
Darby, G. R., Auto Mechanics Course, 159.
Domm, L. V., The Effectiveness of Our Schools in the Teaching of the Biological Sciences, 57.
Dresia, William F., Science Is Fun, 119.
Hawkes, Mary M., A Club Hobby Can Become a Class Activity, 120.
Irving, James R. and Smith, T. E., Electric Periodic Chart of the Elements, 157.
Jones, Norman R. D., This and That, 20; 74, 154; 174.
Keele, V. S., Audio-Visual Problems and Suggestions, 167.
Krenerick, H. Clyde, Gay-Lussac's Law and Absolute Zero, 66.
Lark-Horovitz, K.
Effectiveness of Science Teaching, 11.
Science Teaching Today, 61.
Martin, W. Edgar, Science Problems of National Significance, 151.
McLean, W. F., Design for Scholarships, 173.
McCreight, Harold B., Audio-Visual Aids in Physics, 67.
Meister, Morris,
Outlook in Science Education, 105.
Professional Standards, 63.
Science in Elementary and Secondary Education, 13.
Rooms for Secondary Schools, 75.
Miller, Edith F., Nature Riddles, 125.
Miller, W. E., Experiments in Illumination, 161.
Novikoff, Alex B., Teaching Science for the Atomic Age, 25.
Patterson, Margaret E.
Good Science Projects Need Not Be Expensive, 70.
Junior Scientists Assembly in Chicago, 27.
Powers, Philip N., Why the Report on the Effectiveness of Science Teaching Was Needed, 11.
Schorling, Raleigh, Mathematics—Grades One to Twelve, 59.
Singerman, Joseph, Kinsey's Study of Sexual Behaviour, 31.
Sollberger, Dwight E., Aids to Elementary Science Teachers, 174.
Sorum, C. H., A Chemist Looks at Science Education, 36.
Sutton, Richard M., Simplicity in Demonstrating Physics, 22; 64; 112.
Taylor, Lloyd W., Effectiveness of the Teaching of the Physical Sciences, 16.
Watson, Fletcher G., A Model of the Solar System, 24.
Webb, Hanor A., Chats with Science Teachers 30; 123; 175.
Yothers, Lee R., Microscope Techniques for Locating Objectives, 178.
Young, Paul R., Children's Gardens Should Be Planned for Children, 21.
